

REJUVINAIR® GOES GREEN

REJUVINAIR® Signs Florida Green Lodging Certification Program Partnership Agreement.

Tallahassee, Florida—April 29, 2005— **REJUVINAIR®** today announced that it has signed a partnership agreement with the Department of Environmental Protection (DEP).

In the agreement **REJUVINAIR®** agrees to use the partnership to promote the Florida Green Lodging Certification program and to assist the lodging industry to reduce its impacts on Florida's fragile environment.

"We will continue to assist and educate those who ask for help," said Richard Namovich, founder / CEO of **REJUVINAIR®**. "The direction we are striving to provide is clean, healthy and environmentally safe indoor air, free of harmful cleaning chemicals and ozone. Partnering with the DEP is another step in the right direction."

To find out more information about this important program. Visit www.floridagreenlodging.org or call Karen Moore at the Florida Department of Environmental Protection 850.245.8726.

REJUVINAIR® Inc. became the World's indoor air quality (IAQ) leader in 1997, by providing a safe and chemical free solution to clean and sterilize packaged air handling equipment. Today, **REJUVINAIR®** continues to lead the IAQ industry in innovation with its **REJUVINAIR® ROOMS** process.

REJUVINAIR® is also spearheading an EPA request for an IAQ education program in elementary schools with it's subsidiary **ME&U&IAQ®** inc. To receive additional information concerning this important IAQ development visit our site at www.meuiq.com and meet Ms. Airheart and the kids at Sunnyside School.

"Children are our future, it is our responsibility to promote, demand and strive to provide healthy and environmentally safe indoor air in our children's schools, where we work, live and play."
